

EXCELLENCE IN TECHNICAL TRAINING

Energy Concepts is the premier producer of high-quality educational systems for contextual science, electronics, and industrial controls training systems. We take pride in providing real-world, hands-on training systems, that prepare students for technology-related careers and the actual work environment.

For over 50 years, our success has come from the unmatched quality of our systems, components, the reliability of our equipment, and the effectiveness of our curriculum. All of our systems are designed to satisfy the most rigorous academic requirements as well as have the ability to accommodate future technological innovations. Our professional training team is highly skilled in both academic and industrial backgrounds. Whatever your field of interest may be, we can provide specialized assistance for the type of training program you need.

Energy Concepts is committed to excellence in contextual science and technical training and will provide you with a comprehensive solution to fit all your needs.

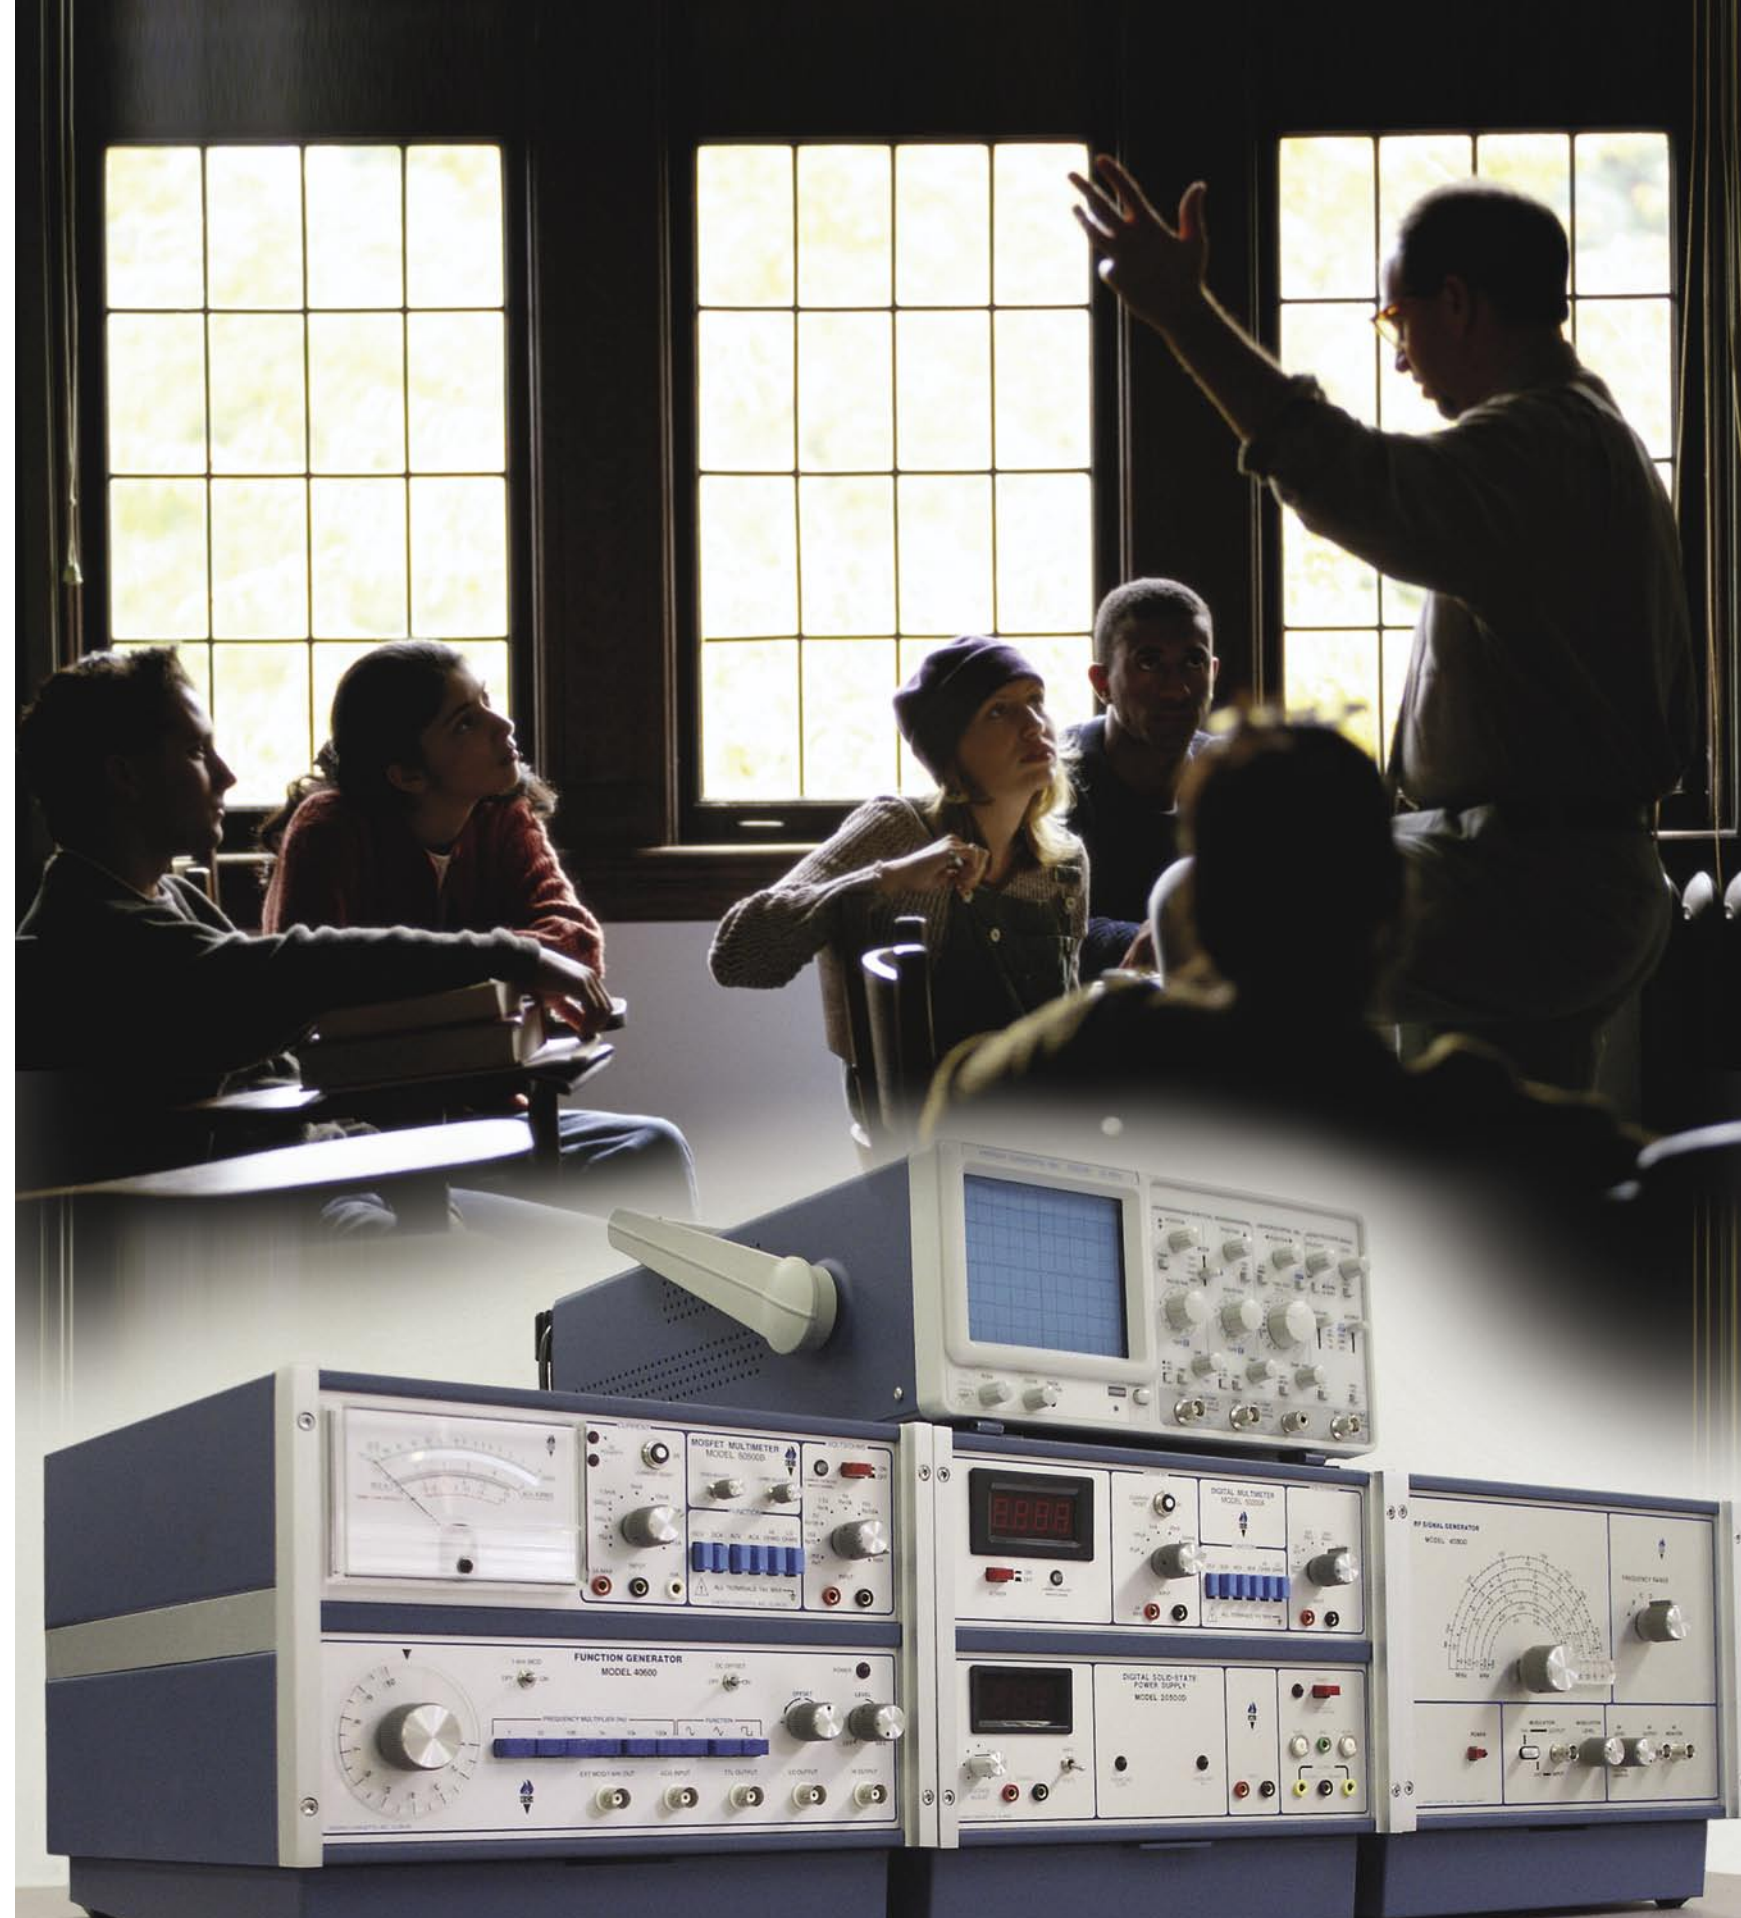

At Energy Concepts, we are committed to designing courses that meet academic needs as well as offer students hands-on experience in the lab. Our goal is to provide your students a well-rounded program that will help them succeed in today's high-tech work environment.

Our training systems are not only complete and turn-key...the components are of the highest quality standards. Our laboratory texts offer many outstanding features which make them exceptional learning tools. These features include multiple-color presentations, learning objectives, highlighted terms, footnotes, glossary, and subject index.

ECI's instrumentation is durable and contains special protection circuits to allow the instruments to survive the learning process. Our instruments are manufactured in the USA, include operation as well as maintenance manuals, and a three-year warranty.

Durability is one of the major advantages in selecting ECI's laboratory furniture. Lab workstations and storage cabinets are constructed with top quality materials. ECI's unique die-cut foam storage system provides organization and fast inventory of parts. The lab furniture has a modular design to allow a wide variety of custom configurations.

Turn-key, quality training systems...

Our training systems will help you prepare your students for today's high-tech world. These systems consist of state-of-the-art equipment, rugged and reliable instrumentation and components fully compatible with industry standards. With Energy Concepts' training,

your students will quickly learn how to use technology, and they'll learn to apply their new skills in the real world.

We are a leader in the development of quality contextual science training systems. Our experiments are designed to provide accurate, repeatable results in every lab allowing instructors to concentrate on the goals of each experiment. In ECI's physics programs, students explore real-life situations while developing problem solving skills.

The Material Science Technology course (MST) has a multidisciplinary approach that teaches students to better understand the properties and uses of materials. Our courses increase the percentage of students who can meet academic and technical literacy goals.

Energy Concepts' complete series of electronics courses cover basic electrical circuits through advanced electronic technology. Our industrial training systems are designed to enable students to develop relevant and employable skills. Our courses ensure that your students will have the knowledge and hands-on experience necessary for a job in a challenging and rewarding career.

Our Commitment to Service

Energy Concepts will provide you with the most complete and effective systems for your training investment as well as allow for integration of tomorrow's technological advancements and developments. We will continuously strive for improvement in all our systems to ensure that students and instructors can concentrate on the learning experience and meeting their educational goals.

Our professional staff maintains a commitment to excellence in addressing all aspects of implementing a successful educational program. Our customer service will be by your side before, during, and after the purchase. We'll assist you with budgetary pricing, instructor training, equipment orientation, and continued technical support after your purchase.

We take pride in our goal of providing practical training systems that prepare students for technology-related careers and professions.
